CFIA: Responding to Today; Building for the Future

Modern Regulatory Toolkit

Outcome-based regulations with new compliance promotion tools

Integrated Risk Management

New risk management tools, analytics and surveillance to inform resource allocations and enforcement priorities

Consistent and Efficient Inspections

Single inspection approach focused on regulatory outcomes and supported by mobile tools and guidance

Digital-First Tools and Services

Electronic access as the preferred method of requesting and receiving services

Global Leader

Pursue improved international standards, fairness in trade practices, enhanced use of technology and regulatory cooperation
