Perfect storm

Role of RPPO

TUNA world

Trade connectivity – case studies

Information connectivity

    Imperatives for sharing – examples from medical

    Better risk awareness and management   } tragedy of the commons

    Technology and protocols for sharing

Tourism and migration

Risks to Asia

    English language view has usually focused on risks to Western countries

Model framework – include uncertainty (Tom Kompass)

Data availability and access (Craik et al. 2018)

    Including models

    AI?

Scenario analysis

Tourism and migration

    Illegal pathway for some pests, hard to confront/manage these risks

*****

Solution – collaboration

Trend in predictability?

Increasing pressure on risk assessors

Data vs. analytical capacity

Accessibility of info – language paywalls

      Cryptic / awareness

Climate availability

Horizon scanning

Threat preparedness piece

Best contribution we can make is to describe what we think a successful risk/biosecurity system will need to look like

Global analyses

EPPO 2016 survey

Introduction

Objective – what would be a successful system? Where to?

Describe our scenario – Asian trade increase, increasing connectivity

     Setting the scene

          One Belt, One Road

          TPP-11

     Horizon scan – near-term

          Darren, Frank, Berta

     1500 words

Analysis – 1500 words
